

SURABHI GUPTA

GIS Technical Consultant | Enterprise GIS | Geospatial Delivery

Mumbai, India | surabhigeo@gmail.com | [LinkedIn](#) | [GitHub](#) | [Blog](#)

PROFESSIONAL SUMMARY

GIS Business Analyst with 5+ years of experience delivering enterprise GIS solutions across municipal, infrastructure, utilities, and renewable energy environments. Experienced in requirements elicitation, business process analysis, functional requirements, stakeholder workshops, UAT, solution validation, technical documentation, and GIS application delivery. Combines business analysis expertise with hands-on knowledge of ArcGIS Enterprise, ArcGIS Pro, Oracle, PostgreSQL, SQL, Python, spatial databases, and GIS automation. Previously provided L3 technical support to Esri Inc.'s US enterprise customer base across distributed environments and time zones.

CORE COMPETENCIES

Enterprise GIS: ArcGIS Enterprise, ArcGIS Pro, ArcGIS Online, ArcMap, QGIS, ArcGIS API for Python, Spatial Data Modelling, Technical Workshops, Technical Documentation, Workflow Design

Business Analysis: Requirements Elicitation, Requirements Analysis, GIS Solution Specifications, UAT, Proof-of-Concept Development, Client Training, Stakeholder Coordination, POC Development

Spatial & Enterprise Databases: Oracle 19c, PostgreSQL, SQL Server, Azure SQL, Enterprise Geodatabases, Spatial Database Design, ETL/ELT Workflows, Spatial Data Pipelines, Schema Design & Optimization

Automation & Development: Python, ArcPy, SQL, Arcade, JavaScript, Node.js, GIS Workflow Automation

WORK EXPERIENCE

GIS Business Analyst

Esri India – Mumbai | Nov 2025 – Present

- Act as technical liaison between a major urban local body and GIS implementation teams, translating departmental workflows and operational requirements into functional requirements, solution specifications, and implementation requirements.
- Lead requirements elicitation, business process analysis, stakeholder workshops, functional documentation, UAT, defect analysis, and solution validation for citizen-facing and internal GIS applications.
- Support two GIS applications across two municipal departments and three stakeholder groups, including a Utility Trenching Permit Management System and Veterinary Health Management Application.
- Translate business workflows into requirements covering user journeys, role-based access, validations, approvals, notifications, reporting, and system integrations.
- Define and validate authentication requirements using LDAP for internal users and mobile OTP for citizen/external users.
- Define and validate functional requirements for Easebuzz and SBI ePay payment integrations, coordinating with development teams through implementation and UAT.
- Design and validate Oracle/enterprise geodatabase structures including tables, views, triggers, stored procedures, sequences, and workflow-related data models.
- Develop GIS proof-of-concepts and support stakeholders in validating solution approaches before implementation.
- Prepare functional and technical documentation, process workflows, UAT scenarios, and implementation specifications.

GIS Database Administrator

Reliance Industries Ltd. – New Energy Division | Dec 2024 – Nov 2025

- Designed and maintained spatial databases for renewable energy assets using Oracle 19c integrated with ArcGIS Enterprise, supporting enterprise GIS data management and application workflows.
- Designed QA/QC workflows to validate geodatabase consistency across development and production environments.
- Automated spatial data ingestion using Python, reducing manual processing for renewable energy asset tracking workflows.
- Supported renewable energy assets/workflows through spatial database, data validation, and GIS data management processes.

GIS Technical Lead

Cybertech Systems & Software – Esri SSG Project | Oct 2023 – Dec 2024

- Resolved 300+ critical geodatabase and GIS service issues across enterprise Esri client engagements and managed complex L3 production escalations.
- Provided direct technical support to Esri Inc.'s US enterprise customer base, coordinating issue investigation and resolution across distributed teams and time zones.
- Delivered 4 GIS technical training programs to 15+ analysts and authored 10+ technical knowledge assets covering GIS-cloud migration, schema optimization, and performance tuning.

GIS Subject Matter Expert

Cybertech Systems & Software – Esri SSG Project | Oct 2022 – Sept 2023

- Developed ArcGIS Online dashboards and web applications for infrastructure and utility-sector clients, translating operational requirements into GIS solutions.
- Implemented server-side scripting and workflow automation, improving SLA adherence by 25%.

- Managed L3 escalations and coordinated with product teams to diagnose enterprise GIS issues and improve geodatabase structures.

GIS Analyst

Cybertech Systems & Software – Esri SSG Project | July 2021 – Sept 2022

- Resolved 400+ enterprise GIS support issues involving versioning, schema conflicts, and database recovery.
- Developed Python and SQL scripts for spatial data correction, schema validation, and recurring GIS support workflows.
- Mentored junior analysts and contributed technical documentation to the internal GIS knowledge base.

SELECTED PROJECTS

Municipal Utility Trenching Permit Management System — GIS Business Analysis & Solution Delivery

- Supported requirements and solution delivery across 10 workflows, 7 user roles, 2 departments, and 200 UAT scenarios.
- Defined requirements covering permit submission, approvals, notifications, payment processing, reinstatement, reporting, LDAP/OTP authentication, and system integrations.
- Supported requirements and UAT for Easebuzz and SBI ePay integrations and contributed to Oracle/enterprise geodatabase schema design.

Municipal Veterinary Health Management Application — GIS Business Analysis & Solution Delivery

- Supported requirements elicitation, functional analysis, workflow definition, UAT, and solution validation across 5 workflows, 10 user roles, 2 departments, and 100 UAT scenarios.
- Translated departmental processes into application requirements covering authentication, data capture, validation, notifications, reporting, and user workflows.

UrbanPulse — **Urban Mobility Intelligence** — GIS | Data Visualization | AI-Assisted Development

- Developed an interactive urban mobility intelligence dashboard with defined KPIs, visualizations, analytical workflows, and user-facing data presentation.

Route Navigator — Node.js | Open-Source Geospatial Data

- Developed a routing application to calculate alternate routes, optimize routing, and generate elevation profiles between multiple points.

WRITING & TECHNICAL COMMUNITY

- GIS Technical Content Creator — Reach 5,600+ GIS and geospatial professionals through educational content on enterprise GIS, spatial databases, automation, and geospatial AI.
- Technical Author, GeoCloud Insights — Published 60+ technical articles covering GIS automation, spatial databases, enterprise GIS workflows, and applied AI in geospatial solutions.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals – Microsoft (2024)
- Basics of Python and ArcPy – Udemy (2023)
- Basics of JavaScript Web Apps – Esri (2023)
- Microsoft Certified: Azure AI Fundamentals – Microsoft (2026)
- Advanced Prompt Engineering for Everyone – Coursera (2025)

EDUCATION

MSc. Applied Geology | Anna University, Chennai | June 2019 – June 2021

Specialization in Hydrogeology – Gold Medalist (CGPA 9.3)

Thesis: "Water Quality and Human Health Risk Assessment"

BSc. Geology Hons. | MS University of Baroda, Vadodara | June 2016 – April 2019

Dr. M. S. Patel Prize Recipient (CGPA 7.8)
